

MOLIKA LON

WEB DEVELOPER

WORK EXPERIENCE

SOMAET -Service_cleaning app

15 FEB 2026 - 31 MAR 2026

Developer & QA

- Develop and maintain web application features for optimal performance and user experience.
- Design, test, and debug APIs and system functionalities.
- Execute manual testing, create test cases, and identify bugs.
- Report issues and collaborate with developers to resolve them.
- Ensure system quality, reliability, and performance before deployment.
- Work with team members to enhance features and user satisfaction.

Javascript Project (Weather)

22 DEC 2025 - 4 JAN 2026

Developer & Project Manager

- Developed and maintained a weather web application for smooth performance and user-friendly experience.
- Integrated APIs to deliver real-time weather data (temperature, humidity, forecasts).
- Tested, debugged, and validated system functionality and API responses.
- Identified and fixed bugs to improve stability and reliability.
- Optimized performance for faster loading and better user interaction.

Algorithm Project (Random App)

15 OCT 2025 - 30 NOV 2025

Developer (individual work)

- Developed a Random Student Picker web app for fair and efficient student selection.
- Designed a user-friendly interface to input and manage student names.
- Implemented random selection using JavaScript.
- Added dynamic features like add, remove, and reset for better usability.

Web Design Project (MOMO's Sweetbites)

01 SEP 2025 - 06 OCT 2025

Developer (individual work)

- Developed and maintained an e-commerce dessert website for smooth performance and user-friendly experience.
- Designed an attractive, responsive interface to showcase products.
- Built core features including product display and search functionality.
- Tested and validated components to ensure accurate content and system reliability.

PERSONAL DATA
