Dear Hiring Manager,

I am writing to express my strong interest in the Web Developer Internship at Shinhan Bank Cambodia. With a solid foundation in backend development using PHP and JavaScript, along with a strong interest in financial technology, I am eager to contribute to building secure and efficient digital banking solutions.

Throughout my academic journey and hands-on projects, I have developed and maintained web applications with a focus on performance, clean code, and user experience. I have experience working with MySQL, HTML/CSS, and JavaScript, and I apply Object-Oriented Programming (OOP) and MVC principles to build structured and maintainable systems. In a recent virtual company project, I collaborated with a team to design and deliver a database-driven web application, where I contributed to backend logic and data management. This experience strengthened my ability to work in a team, solve real-world problems, and deliver reliable solutions.

In addition, I am familiar with Agile development practices and have used JIRA for task management and Git for version control. I am highly interested in modern financial technologies, including digital payment systems and API integration, and I am motivated by Shinhan Bank Cambodia's commitment to innovation, security, and delivering seamless digital experiences to customers.

What excites me most about this opportunity is the chance to gain practical experience in a professional banking environment while contributing to impactful projects. I am eager to learn from experienced developers, improve my technical skills, and support the development of secure and scalable applications.

Thank you for considering my application. I would welcome the opportunity to further discuss how my skills and enthusiasm align with the goals of Shinhan Bank Cambodia.

Sincerely,

Molika Lon

01 SEP 2025 - 06 OCT 2025

Developer (individual work)

- Developed and maintained an e-commerce dessert website to ensure smooth performance and a user-friendly experience.
- Designed an attractive and responsive interface to showcase products effectively.
- Built core features, including product display and search functionality.
- Tested and validated components to ensure accurate content and system reliability.

TECHNICAL SKILLS

- PHP
- JavaScript
- Node.js
- OOP with Type
- Script SQL,
- MYSQL,
- Vue.js
- UX/UI
- Algorithm using Python
- Data Analytics with Power BI

DEVELOPMENT TOOLS

- Git
- GitHub
- Jira
- Figma (Design)
- AI Tools (ChatGPT, Gemini, Claude, Grock Poe V0 etc.)
- AWS
- Netlify / Vercel
- MS Office (Word, Excel, Power Point)

LANGUAGES

- KHMER (Fluently)
- ENGLISH (Pre-intermediate)

ADDITIONALLY

- Company Visit : AIA , Codingate, Bread Bank, DDD, PDB Bank.
- Workshop : 5th career fair ,

INTERESTS

- Researching new technology
- Writing code
- Joining workshop
- Designing
- Learning new languages
- Teaching
